- participated in **Data Analysis contest by IIUC Data Science Research Group**
- participated in **"Mastering Data Analysis For Business Development & Research"**. by Rajshahi University Science Club

PROJECTS

Sales Data Analysis

January 2023 - Present

This ongoing project is still on process and done using Python language and numpy, matplotlib libraries. A project where it is needed to analyze sales data to identify trends and patterns, and create forecasts for future sales.

Real-life problems management system | Team Leader

January 2022 - June 2022

This project was done using Python and a framework named Django. By this software individuals or organizations could manage and resolve problems or issues that arise in their day-to-day operations.

House Rent Management System | Team Leader

May 2020 - November 2020

This project was done using Java and an IDE named Netbeans. It was a project like Airbnb. Landlords or property managers can manage their rental properties, tenants, rent payments, and maintenance requests efficiently
